

Kallidus' learning accessibility checklist

To determine whether a software application is accessible, the application should be evaluated according to a set of guidelines or standards that defines software accessibility.

- ✔ Supports WCAG 2.0 compliance
- ✔ Simple UX/UI – ideally validated by a third party
- ✔ Multi-language capabilities
- ✔ Content supports WCAG 2.0, multiple languages and mobile devices
- ✔ Full mobile application that supports WCAG 2.0
- ✔ Supports Single Sign On

Things to look for when evaluating your learning provider's commitment to accessible learning for all.

- ✔ Live video or audio content includes captions
- ✔ The contrast ratio between text and page backgrounds is at least 4.5-to-1
- ✔ Text on pages can be resized to 200% while still maintaining the form
- ✔ Images are not used where text can achieve the same purpose
- ✔ Pages on the site can be accessed in multiple ways
- ✔ Menus and buttons are used consistently regardless of the user's location on the website
- ✔ An error prevention technique is used whenever the user enters sensitive data
- ✔ Underlined text that does not provide a link is removed
- ✔ Redundant links on the same page are eliminated or minimized

Use this template to help evaluate your LMS providers.

Capability	Vendor	Tested	Comments	Vendor	Tested	Comments	Vendor	Tested	Comments
Simple and easy UI/UX for Desktop and Mobile	Kallidus	Yes	Works on all devices seamlessly						
WCAG 2.0 Compliant	Kallidus	Yes	Works on all devices seamlessly
